

Third NEWSLETTER - August 2021

NE4HEALTH Value Chain Analysis

NE4HEALTH value chain analysis goal is to define common components of the value chain and position the members of the clusters within each stage. This will be achieved by using the value chain mapping approach.

NE4HEALTH value chain analysis is a public document and is a part of Work Package 1. Involvement of Cluster Members in the Partnership. This document will ensure a balanced partnership among all project members.

You can read the NE4HEALTH Values Chain Analysis by accessing the following link:

The NE4HEALTH Strategic Dissemination Communication and Exploitation Plan (SDCEP)

D.4.1: Strategic Dissemination Communication and Exploitation Plan (SDCEP), lists all planned dissemination and communication activities, tools and channels, and matches them with target stakeholders' categories and key performance indicators. This Dissemination & Communication Plan will be a reference framework for evaluating the impact of dissemination activities of the project.

The NE4HEALTH Mid-term Report

The NE4HEALTH Mid-term Report constitutes a summary of the project activities done in WP 4 - Dissemination & Communication, by members of NE4HEALTH consortium in the first 9 months of the NE4HEALTH Project implementation.

Some of the project objectives are:

- To raise awareness of the project activities and events.
- To communicate and disseminate the findings and results among stakeholders, cluster networks, authorities, both inside the project and outside the project's borders.
- To identify and use the appropriate channels to efficiently communicate with the target groups and stakeholders (including the identification of events, social media networks, press, multiplier organizations, etc.).

The full report can be accessed by following the link below:

NE4HEALTH Networking Report

NE4HEALTH Networking Report (D.5.2) constitutes a summary of networking activities done by each of the members of the NE4HEALTH consortium. It compiles both, the activities carried out to date and those we plan for the coming months. Activities such as participation in events, from the ECCP or others, internal events or activities from partners, synergies with other projects and with other clusters.
